—  
Women's Lingerie Manufacturer

# Ainée

Women's lingerie manufacturing is our specialty and our day by day challenge. Every day, we do our best to create flawless and stitch perfect products.

Ainée was founded in 2010 out of passion for details and beauty. By our side, was a group of qualified confectioners, with over 15 years experience in lingerie manufacturing. We are currently working in a 2000 m<sup>2</sup> market house that includes two production halls, a quality control department and two storage halls, one for the final products and another for fabrics and other materials.

So far, we have closely worked with various lingerie brands all around Europe. Their satisfaction with our work is an incentive for bringing our products to a higher quality level and target more challenging projects.

More than 7000 products are ready to be dispatched every day.

## Fabrics, threads and products

We are currently dedicated to women's lingerie manufacturing. Each day, our confectioners use more than half a ton of fabric and 400 km of thread to create elegant products for our customers.

We also use 1700 m of lace to add style and personality to lingerie, so that every woman would feel special and beautiful.

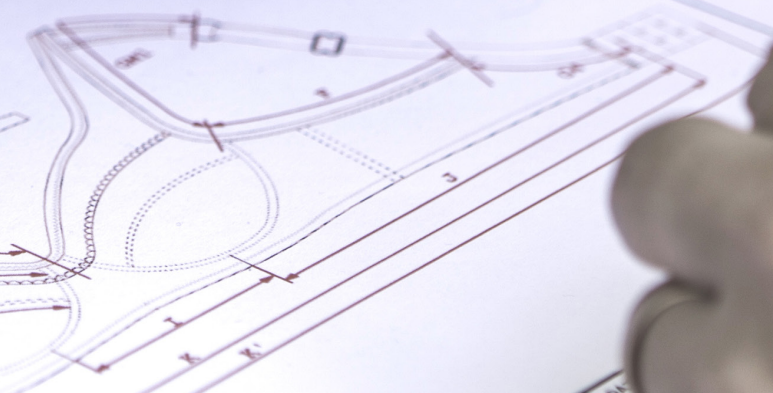

## Quality Control

Once sewn, each product is carefully examined. We value properly made things and we always provide our customers with the best quality. Technological processes are precisely followed in order to achieve a minimum waste of material and scrap items.

We believe in long-term relationships based on respect, thus we strive everyday to bring our clients the best quality/price ratio.

## Experience

We currently have more than 200 confectioners with over 15 years experience in lingerie manufacturing, who have worked for various notorious brands all over Europe such as DIM, Chantal Thomass, Playtex, Bellinda, Nur Die, Lovable, Intimissimi, Calzedonia, Sariana, Jolidon and Delta Galil.

Over the years, we have been working on various projects, which allowed us to evolve and get a professional approach on lingerie manufacturing.

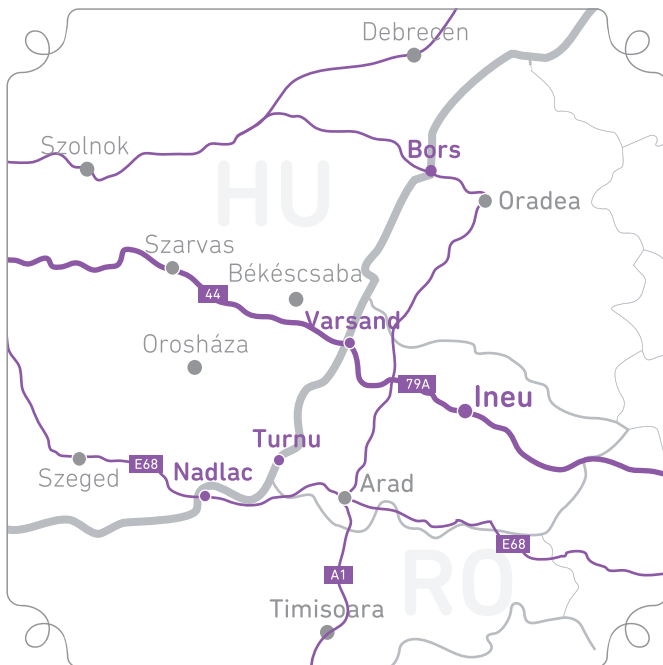

## Work with us

Ainée operates according to a complex integrated management system regarding the environment, quality and work safety and security, which complies with ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 standards.

We follow strict operational and system procedures that establish the working standards. Each project is completed at high standards, enabling us to provide our clients the quality they deserve.
